CONA Cables are manufactured from excellent quality electrolytic grade bright annealed copper conductor bunched together and insulated with special grade PVC compound having high insulation resistance and dielectric strength. It is non-corrosive and has special flame retardant and low smoke emitting properties. The Cables are Manufactured in State of the Art Manufacturing Plant with latest Technology & Technique. Each metre of wire goes through flammability test, ageing test, high voltage spark test to assure there are no weak spots anywhere in the insulation. It is ideal for concealed and conduit wiring. **CONA** cables carry  standardization mark and quality certification which assures complete safety, reliability and consistency in performance.
